dihydroxyindan, 1,2-dihydroxy-1,2,3,4-tetrahydronaphthalene, which convolves contacting them with naphthalene, biphenyl, phenanthrene, involves contacting them with naphthalene, biphenyl, phenanthrene, convolves contacting them with phenanthrene. The polypeptides and the host cells are also useful for preparing 1,2-dihydroxy-1,2-convolves contacting them with phenanthrene. The polypeptides and the involves contacting them with phenanthrene. The polypeptides and the host cells are also used in bioremediation in which they oxidise an aromatic compound such as indene, 1,2-dihydronaphthalene, oxidise an aromatic compound such as indene, 1,2-dihydronaphthalene, dibenzo(1,4)dioxan, conveyclohelpt-1-ene, anthracene, phenanthrene, dibenzo(1,4)dioxan, cacenaphthylene, naphthalene, biphenyl, fluorene, dibenzo(1,4)dioxan, dibenzothiophene, 9,10-dihydroanthracene, or 9,10-dihydrophenanthrene a corresponding dihydro dihydroxy compound. The polypeptides and the host cells are useful for preparing chiral diols for use in the polymer, cresin, pharmaceutical or rubber industry. The present sequence represents a naphthalene dioxygenase (NDO) mutant alpha subunit, given in the cxemplification of the present invention.
                                                                                                                                                                                                                                                                                                                                                                                             Matches

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Searched:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Scoring table:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Sequence:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Title:
Perfect score:
         Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
